

Clinical Research

Hylant's life science experts understand the clinical trial process, and the role of the sponsors, individuals, and organizations affiliated with the studies.

Hylant understands the many complex exposures and regulatory issues that affect life science companies and can develop specific insurance programs to meet your needs. One area of expertise lies in the clinical research industry.

Discovery

We start with a comprehensive analysis of your current coverage and business needs. This process helps us identify gaps and potential exposures.

Program Design

We then work with you to build the most effective programs to manage and finance risk. The goal is to protect assets, improve efficiencies and reduce operating costs.

Services

- Protocol and informed consent consultation
- Contract review and recommendations
- Risk management and loss control services
- Domestic and international capabilities
- Proprietary technology
- Exclusive partnerships with insurance carriers who specialize in your industry

Hylant's life science experts understand the clinical trial process as well as the role of the sponsors, individuals, and organizations affiliated with the studies. With this understanding and our industry-specific experience, we are able to provide the most comprehensive coverage, while minimizing overall exposure and risk to our clients.
