

HYLANT GLOBAL CAPTIVE SOLUTIONS

CAPTIVE CONSULTING. CAPTIVE MANAGEMENT.

About Hylant Global Captive Solutions

We believe that risk management is important, and so do our clients. But finding the right solutions isn't always a clear path. With this in mind, we help you navigate the world of captive insurance to better define, finance and manage the risks inherent in your business.

Our team works closely with you to deliver a broad spectrum of appropriate alternative risk solutions. A customized captive solution can play a crucial role in your organization's long-term success.

What We Do

Enterprise risks are constantly changing, especially emerging risks caused by technological, political and regulatory unpredictability. On an annual basis we facilitate a risk identification process, quantify risks that are not covered by traditional insurance programs, and formalize an alternative risk financing strategy, based upon our analysis. The process engages members of your executive management team to provide their unique perspectives regarding actual scenarios that could cause significant operational and financial disruption. By focusing on areas with high potential impact and likelihood of occurrence, we can better secure the financial future of your business.

How We Do It

We have purposely staged our captive formation process to allow for education, exploration and an eventual election to move forward. Together, we learn about your business situation and whether a captive solution might be right for you without investing significant time or financial resources.

Once we decide if a captive is the right solution for your organization, we continue to work as your partner to address your alternative risk needs.

Hylant Global Captive Solutions Process

Hylant Global Captive Solutions Difference

Our role is to provide you with an independent alternative risk assessment. If that means facilitating a group captive, a single parent captive or no captive at all, we will always share the “why” behind the “what” in a way that can easily be understood.
